

### Systems Immediately Subject to and At Risk of FSRP Formulation Requirement

The FSRP requirement is triggered for retirement systems that have had amortization periods over 40 years for three consecutive annual actuarial valuations, or two consecutive actuarial valuations if the systems conduct the valuations every two or three years.

The at-risk systems' most recent actuarial valuation shows an amortization period that exceeds 40 years but does not yet trigger the FSRP requirement.

<sup>1</sup>Texas Government Code Section 802.2015(d) requires plans to formulate a revised FSRP if the system conducts an actuarial valuation showing that the system's amortization period exceeds 40 years, and the previously formulated FSRP has not been adhered to.

**Progress Report on Previously Submitted FSRPs**

The following plans have previously formulated an FSRP. The table below outlines their progress towards the FSRP requirement.

<sup>1</sup> Based on the most recent valuation or FSRP.

<sup>2</sup> The year in which a plan must reach an amortization period of 40 years or less.

<sup>3</sup> The amortization period reflects estimates of actions that occurred after the valuation date. Plans will be removed from the list if a subsequent valuation reflects an amortization period of 40 years or less.

<sup>4</sup> The amortization period does not consider already approved assumption changes that will likely result in the plan being out of compliance with the FSRP when the plan completes its December 31, 2018 actuarial valuation.
